

# Cat Factsheet

It's important to keep your pet happy and healthy, so find out the five basic welfare needs for cats in this fun factsheet.

## Home

### Out and about.

Our feline friends just love catnapping in a cosy bed or on a sofa. Once they've had a good snooze, make sure they've got a cat flap so they can explore the great outdoors whenever they like.

## Diet

### Feeding time.

Cats love to eat dry or wet food, so feed them the purr-fect amount, so they don't become underweight or overweight. Remember, cow's milk can make them poorly, so only give them water to drink.

## Companionship

### Pet pals.

Every cat is different. Some cats like animal buddies, maybe other moggies or even dogs. Some might be a scaredy-cat around other pets, or just happy to have the house to themselves!

Helping pets and their people

## Vet Care

### Health and wellbeing.

Keep your feline fine with a yearly vet health check and their vaccinations. Don't forget to flea and worm them, which protects you too. Neutering is also a good way of preventing lots of unexpected little kittens!

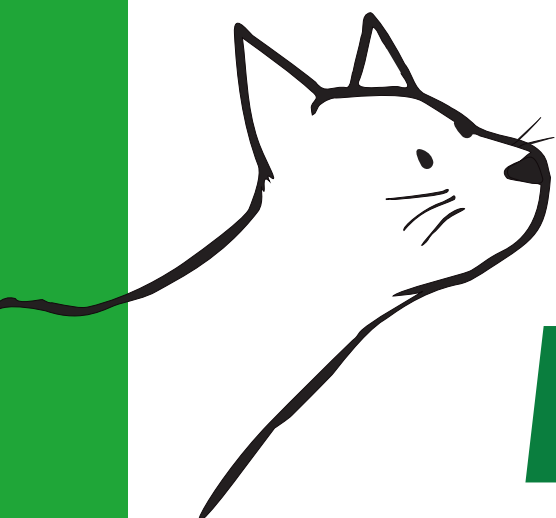

## Normal behaviour

### Keep your pet happy.

Cats like to explore and hunt outdoors, so give them toys which stimulate those natural hunting instincts when playing at home. Scratching posts also help them to mark their territory, instead of using your carpets or sofa!

Cats come in all shapes, sizes and breeds, from mammoth maine coons to slinky siamese!

Milk is not a cat's best friend and can make them really unwell, as they're lactose intolerant.

The purr-fect place to stroke a cat is on their head!
